EXPERIENCE

2023 - PRESENT

Bahawalpur Pakistan

Code's Thinker

- Design Implementation: Translated UI/UX designs into responsive and interactive web interfaces using HTML, CSS, and JavaScript.
- Collaboration: Worked closely with designers, backend developers, and project managers to ensure cohesive and efficient development processes.
- Performance Optimization: Optimized website performance and loading times by employing best practices in coding and leveraging tools for performance testing.
- Cross-Browser Compatibility: Ensured consistent look and functionality across different web browsers and devices.
- Bug Fixing: Identified, debugged, and resolved issues related to user interfaces and frontend functionality.
- Version Control: Utilized version control systems like Git for source code management and collaboration.
- User Experience (UX) Enhancement: Applied user feedback and analytics to enhance user experience and usability of web applications.
- Responsive Design: Implemented responsive design principles to ensure websites are mobile-friendly and accessible across various devices.
